

Vinothraj P

B.E. Computer Science and Engineering

Phone: +91-9384794005 | vinoloke1973@gmail.com | www.linkedin.com/in/p-vinoth-raj | <https://github.com/VINO123RAJ>

CAREER OBJECTIVE

Motivated and detail-oriented Computer Science undergraduate seeking opportunities to apply academic knowledge and practical skills in software development. Eager to contribute to dynamic teams, enhance technical expertise, and deliver efficient, user-friendly solutions while continuously learning and growing in the IT industry.

TECHNICAL SKILLS

Programming Languages: Python, C
Web Development: HTML5, CSS, JavaScript
Frameworks & Tools: React.js, Node.js
Tools & Platforms: Git, GitHub, Orange
Concepts & Methodologies: AI & Automation Fundamentals, Responsive Web Design

EDUCATION:

Bachelor of Engineering - Computer Science (2022 – 2026)
Misrimal Navajee Munoth Jain Engineering College (CGPA – 8.6)

PROJECTS:

Automated Workflow Execution using n8n and NLP

- Developed an automation platform using Python, FastAPI, MySQL, and n8n that converts simple English instructions into automated workflows for email generation, PDF data extraction, Google Sheets updates, and scheduled reports.
- Built backend APIs and workflow modules to automatically create and execute n8n pipelines, enabling task automation and secure data storage in MySQL.

Adaptive AI Proctored Examination & Performance Analytics System

- Developed a full-stack AI-powered online examination platform using Python FastAPI, React, MySQL, and JWT authentication with secure role-based access for students and administrators.
- Implemented adaptive exam logic that dynamically adjusts question difficulty based on student performance, along with real-time proctoring features including face detection, tab-switch monitoring, fullscreen tracking, and suspicious activity logging using OpenCV and MediaPipe.
- Designed analytics and evaluation modules to generate automated performance reports, topic-wise weakness analysis, accuracy metrics, time management insights, and intelligent anti-cheating alerts with real-time admin monitoring dashboards.

AI-Powered News Summarizer Web App

- Built an AI-powered web app that summarizes news articles using NLP techniques.
- Developed a responsive frontend and integrated Python-based summarization logic.

AI Voice Assistant (JARVIS-Style)

- Developed a Python-based voice assistant using HTML, CSS, JavaScript, Python, and Eel with integrated speech recognition and voice output.
- Implemented face authentication, wake-word detection, and WhatsApp automation for messages and voice/video calls.
- Automated web search and system control tasks, improving productivity by up to 8%.

Weather Sphere – Real-Time Weather App

- Enhanced a responsive weather application using HTML, CSS, and JavaScript..
 - Integrated Open Weather Map API to fetch live weather data with error handling..
 - Designed an interactive UI with responsive layout and weather icons.
-

INTERNSHIPS

Frontend Developer Intern | Finari Services Pvt Ltd (onsite) (Jun – Oct 2025)

- Built responsive web applications using React, HTML, CSS, and JavaScript.
 - Focused on user interface design to improve usability and visual consistency.
 - Integrated REST APIs to fetch and display dynamic data.
 - Optimized application performance for better load time and responsiveness.
-

CERTIFICATIONS

JavaScript Front-end Development: Development Basics – Infosys Springboard (Jun 2025). 30-Day Masterclass on Full-Stack Development – Novitech R&D Pvt. Ltd.
NPTEL Certification – Data Analytics with Python (12 weeks) Python Basics – Level Up Program – Digilabs.
Introduction to Python – Learn Tube by Career Ninja.

Leadership & Activities

- Event Head – National Science Day 2025, MNMJEC
 - Committee Member – CSE Symposium 2025
-

Publications:

Automation Builder: Natural Language-Driven Workflow Generation Using Large Language Model and N8N

- Published a research paper in the International Journal of Engineering Research & Technology (IJERT), Volume 15, Issue 05, May 2026.
- The paper focuses on AI-powered workflow automation using Natural Language Processing, Large Language Models, and n8n for automatic workflow generation through simple English instructions.
